Announcement of Cooperative Agreement to the Association of State and Territorial Directors of Health Promotion and Public Health Education

Summary

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 1995 funds for a sole source cooperative agreement with the Association of State and Territorial Directors of Health Promotion and Public Health Education (ASTDHPPE) to build health promotion and public health education. Approximately \$100,000 will be available in FY 1995 to support this project. This award will begin on or about September 30, 1995, and will be for a 12-month budget period within a project period of up to 5 years.

Continuation awards within the project period will be made if progress is satisfactory and funds are available.

The purpose of this cooperative agreement is to assist the ASTDHPPE, a key partner to CDC, in determining and developing the training, research, and program implementation requirements to build health promotion and public health education capacity at the State and territorial level.

The CDC will provide consultation, assistance, and support in planning, conducting, and evaluating program activities; plan and conduct the Annual National Conference on Health Promotion and Health Education; collaborate with the ASTDHPPE to improve effectiveness in Managed Care and Worksite Health Promotion; encourage and facilitate the participation of ASTDHPPE members in on-site technical assistance visits; and provide continuing updates on scientific, operational, and funding developments in the areas of health education and health promotion.

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of "Healthy People 2000," a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Educational and Community-Based Programs. (For ordering a copy of "Healthy People 2000," see the section "Where to Obtain Additional Information.")

Authority

This program is authorized under section 317(k)(2), of the Public Health Service Act, 42 U.S.C. 247b(k)(2), as amended.

Smoke-Free Workplace

The Public Health Service strongly encourages grant recipients to provide a smoke-free workplace and promote the nonuse of all tobacco products, and Public Law 103-227, the Pro-Children Act of 1994, prohibits smoking in certain facilities that receive Federal funds in which education, library, day care, health care, and early childhood development services are provided to children.

Eligible Applicant

Assistance will be provided only to the ASTDHPPE. No other applications are being solicited. The program announcement and application kit have been sent to ASTDHPPE. Eligibility is limited to ASTDHPPE since it is the only appropriate and qualified agency that can provide the services specified

under this cooperative agreement. ASTDHPPE is the only national nonprofit health education organization in which program directors and staff representing all States and territories are members. As such, it is uniquely capable, and organized specifically, to serve as a leader and a convener of activities relative to State health education programs. ASTDHPPE has a unique relationship with the Association of State and Territorial Health Officials (ASTHO) and ASTHO affiliates. It is the only organization whose primary mission is to promote health education and health promotion as core disciplines of public health practice and to advocate for quality health education and health promotion programs and strategies to address the nation's leading health problems. ASTDHPPE has served as a health education and health promotion policy development and capacity-building organization since 1946, and historically has strengthened public health education goals and objectives. The membership is uniquely diverse and its members, who provide major leadership to State and territorial categorical health areas, have strengthened health education and health promotion programs nationwide.

ASTDHPPE also provides consultation and technical assistance to numerous agencies and has liaison relationships with many national organizations. In this way, the Association is deeply involved in health education and health promotion program development and evaluation efforts conducted nationally.

In collaboration with other national organizations, the Association accomplishes its mission by disseminating information on state-of-the-art health education and health promotion policies and strategies. The Association has the established relationships and expertise necessary to accomplish the requirements of this cooperative agreement. The unique information exchange among the ASTDHPPE members and expert program knowledge provide it with special credibility with national, private, and voluntary agencies.

Executive Order 12372 Review

This program is not subject to Executive Order 12372 review.

Public Health System Reporting Requirement

This program is not subject to the Public Health System Reporting Requirement.

Catalog of Federal Domestic Assistance Number
